

(F) Alternative Fingerings for the Flute by Nestor Herszbaum is a comprehensive guide, from B3 to G7, to harmonic, alternate, trill, and tremolo flute fingerings, and also includes basic fingerings as well as those that raise or lower pitch and change colors. Key options, such as B-foot, C#-trill key, and split-E mechanism are given, and the explanations are thorough with large and easily understood graphics. Index tabs would help players find particular sections more easily in this spiral-bound book, which is an excellent addition to any flutist's library. (\$23, Herszbaum) D.B.S.
